ConCore®: CC1000 Panel-24"

**SPECIFICATIONS**

**General information**
- Panel weight: 7.5 lbs./ft² bare.
- All steel welded construction filled internally with a cementitious core material.
- Protected from corrosion by an epoxy paint finish.
- Class A flame spread rating.
- Non-combustible material.

**UNDERSTRUCTURE OPTIONS**
- Freestanding
- 2" Bolted Stringer
- 4" Bolted Stringer

**COVERING OPTIONS**
- Tile factory laminated with integral trim edge
  - 1/8" HPL_____ (Color)
  - 1/16" HPL_____ (Color)
  - 1/8" Conductive HPL_____ (Color)
  - 1/16" Conductive HPL_____ (Color)
- For additional laminate options contact Inside Sales

**Bare Painted Panel Options**
- Bare Painted Finish to accept carpet tile application
- Bare Painted Finish to accept PosiTile application

**System Performance Criteria (Tested on Actual Understructure)**

1. All load tests are performed using the CISCA Recommended Test Procedures for Access Floors with the exception of Design Load. Design Load capacities are verified using the CISCA Concentrated Load procedure (with loads applied through a 1" dia. Indenter at the weakest point) but with the panels supported by actual understructure rather than steel blocks. (Tests on panels supported by blocks are not representative of panel or system performance in actual installations.)

2. Safety factor is Ultimate load divided by Design load.
